Sample content included
Pre-loaded 3D content available

Mixer Amplifier

Output: 25 watts RMS
Sources: Computer, laptop, microphone, aux
Outputs: 3-Speakers, line-level jacks

Based on end user requirements, the AVRover pictured here may look different and contain different components

Teach where you want, the way you want

Proven to increase student performance

Studies have shown using 3D increases test scores and retention in STEM subjects by as much as 33%*. By presenting key concepts within a multi-sensory, interactive learning environment, students grasp key concepts faster, all while being engaged on a more personal level by the same presentation.

Easy to use

With content management software from SAFARI Montage teachers have real time access to digital resources and a single search engine to make it easy to take advantage of everything the AVRover STEM lab has to offer.

Key Features:

- SAFARI Montage Live! Ready
- On board computer
- All components are secure even while in use
- Patented projector mount easily adjusts image height
- Universal Projector mount accommodates most projectors
- Convenient Connectivity for all your devices
